Book Descriptions:

C253 konica minolta manual

To ensure the best possible performance and effective use of the machine, read this manual thoroughly before using the security functions. The Administrator of the machine should keep this manual for ready reference. The Service Engineer should check the following items, then explain each checked item to the Administrator of the machine. To Service Engineer Make sure that each of these items is properly carried out by checking the box on the right of each item. The machine does not accept setting of an easily decipherable password. Roles and Requirements of the Administrator The Administrator should take full responsibility for controlling the machine, thereby ensuring that no improper operations are performed. Is it possible to gain access to the Administrator Settings while a job is being executed % The machine does not accept access to the Administrator Settings while a job is being executed. Wait until the execution of the job is completed before attempting to access the Administrator Settings again. What happens if a wrong Administrator Password is entered % If a wrong Administrator Password is entered, a message appears saying that there is a mismatch in the Administrator Passwords and entry of the Administrator Password will be prohibited for five sec. If the Administrator Password is forgotten, it must be set again by the Service Engineer. Contact your Service Representative. The machine then takes a count of the number of unsuccessful accesses to the Administrator Settings to prohibit the authentication operation. The External Server that can be used for authentication is Active Directory only. Operate the machine in Active Directory. Make the necessary settings. If no operations are performed for a predetermined period of time during access to the Administrator Settings or user mode during setting of User Authentication from the control panel, the System Auto Reset function automatically causes the user to log off from the mode. <http://escueladeballet.com/fotos/delonghi-steam-cleaner-st100p-user-manual.xml>

What if an Administrator Password different from that is currently registered is mistakenly entered % If there is a mismatch between the currently registered Administrator Password and the Administrator Password entered, a message appears that tells that there is a mismatch in the Administrator Passwords. It also enables the operation for setting and changing the Encryption Key when the optional Security Kit SC503 is mounted. What happens if the HDD Lock Password entered does not meet the requirements of the Password Rules % If the HDD Lock Password entered does not comply with the Password Rules, a message appears that tells that the HDD Lock Password entered cannot be used. Enter the correct HDD Lock Password. Now, turn OFF and then turn ON the main power switch. Note NEVER forget the HDD Lock Password set through the above procedure. The HDD Lock Password must be entered when changing canceling the HDD Lock Password. Now, turn OFF and then turn ON the main power switch. The following screen appears after the machine has been restarted. Call the Administrator Settings to the screen from the control panel. What happens when HDD Format is executed % Executing HDD Format erases data in the HDD. It is recommended that important data be saved in a backup medium in advance. Perform HDD Format. A message appears requesting confirmation of the execution of HDD format. Now, turn OFF and then turn ON the main power switch. Now, turn OFF and then turn ON the main power switch. When the machine is to be discarded, or use of a leased machine is terminated at the end of the leasing contract, the Overwrite All Data function overwrites and erases all data stored in all spaces of the HDD. Call the HDD Settings to the screen from the control panel. Now, turn OFF and then turn ON the main power switch. Note After the main power switch has been turned on, quickly turn it off and give the machine to the Service

Engineer. <https://gites-morbihan-sud.com/userfiles/delonghi-st100p-manual.xml>

If it is absolutely necessary to leave the machine, be sure first to log off from the Administrator Settings. If it is absolutely necessary to leave the machine, be sure first to log off from the Administrator Settings.. If it is absolutely necessary to leave the machine, be sure first to log off from the Administrator Settings. If it is absolutely necessary to leave the machine, be sure first to log off from the Administrator Settings. If it is absolutely necessary to leave the machine, be sure first to log off from the Administrator Settings. The IC card reader installed in the machine is used to read the IC card. The PKI encrypted document stored in the machine can be decrypted only by an encrypted IC card, which makes this function just right for printing highly confidential documents. You'll find the answers to all your questions on the KONICA MINOLTA BIZHUB C253 in the user manual information, specifications, safety advice, size, accessories, etc.. Detailed instructions for use are in the User's Guide. User manual KONICA MINOLTA BIZHUB C253 User guide KONICA MINOLTA BIZHUB C253 Operating instructions KONICA MINOLTA BIZHUB C253 Instructions for use KONICA MINOLTA BIZHUB C253 Instruction manual KONICA MINOLTA BIZHUB C253 Your user manual KONICA MINOLTA BIZHUB C253 Page 2 Powered by TCPDF www.tcpdf.org Ma Thank you, for helping us keep this platform clean. Please also check your spam folder. In order to allow functionality of this product fully and to use it effectively, please read through this user manual, and then get started. For copy, scan, box, and fax operations, refer to the respective user manuals. For details on the Windows or Macintosh operating systems, or software applications, refer to the respective manuals. Be sure to read this manual before using the machine.

The machine may not operate correctly if it is turned on immediately after being turned off. Using a Web browser on a computer connected to the network, machine settings can be specified and the status of the machine can be checked. Some settings can be specified from the computer instead of from the machine control panel. The following shows how to log in to Administrator mode. For details, refer to the respective sections. Displays the It may take a few minutes Specify the Confirm

whether both Email addresses match, and then register the certificate. After registering the Email address, send the message with a digital signature attached from the computer on the network to this machine. If the Email address registered in this machine matches the Email address of the received certificate, the certificate is automatically registered. For details, refer to the respective sections. In order to perform a Scan to PC SMB operation, first specify shared file settings in Windows on the computer receiving the data. To specify a destination computer using the computer name in the IPv6 environment, the Direct Hosting setting must be enabled. When the Direct Hosting setting is enabled, the DNS server is used for name resolution to start communication with the computer name specified and the IPv6 address is acquired. To use the direct hosting service, prepare a DNS server and specify the DNS settings of this machine correctly. To enable the Direct Hosting setting, prepare a DNS server and be sure to specify the DNS settings of this machine correctly. In addition, if the POP server supports POP over SSL or APOP authentication, settings for these can be specified. Therefore, no domain name setting on this machine is not required. If there are two domains or more to which the user belongs, however, specify the domain name to which the user belongs.
